

Innovative ESRD Quality Reporting System (EQRS) Transplant Waitlist Dashboard

The dashboard contains:

- All dialysis patients waitlisted with one or more transplant centers.
- Contact information for dialysis facilities and transplant centers.
- Patients' waitlist details and status.

Dialysis facilities can:

- Track a patient's waitlist status.
- Communicate with transplant centers.
- Help patients maintain their active transplant waitlist status.
- Filter information by patient, setting, waitlist status, and more.
- Download waitlist information files.

The screenshot displays the EQRS Dashboard interface. The top navigation bar includes 'EQRS', 'Dashboard' (highlighted with a red box), 'Facilities', 'Patients', and 'Reports'. The main content area is titled 'Dialysis Facility Transplant Waitlist' and 'Dialysis Facility Records'. It features a 'FILTER BY' section with search boxes for 'Patient' (Search patients (EQRS ID or name)) and 'Transplant Center' (Search transplant center), a 'Waitlist Status' dropdown menu, and a 'Reset all' link. Below the filters, it shows '7 results' and a table with columns: Patient, Waitlist Status, Active / Inactive Date, Waitlisted Date, Waitlist Removal Date, Removal Reason, and Most Recent 2728 Dialysis Start Date. The table headers have sort icons (up/down arrows and a circle with an 'i').
