

PRC Reports & Oversight for CEOs

CAPT JOE BRYANT
CEO, CLINTON SERVICE UNIT
AUGUST 13, 2024

Rationale: Financial

- PRC is generally a significant portion of overall service unit budget
- Line item funding with specific purpose (unlike H&C)
- PRC funds do not expire & remain available until fully expended
- Multiple financial transactions impact overall funding
 - Obligation of PRC purchase orders (POs), UFMS commitments/obligations & POs
 - PRC register (i.e. PRC checkbook)
 - Funds are required to be allowanced down to the service unit into the PRC register
 - Undelivered orders/obligated PRC POs pending payment (open vendor document)
 - Funds are required to transmitted back and forth to UFMS and FI
 - Requires reconciliation efforts for full accountability

Rationale: Operations

- Important for monitoring overall health of PRC program
- Multiple operational actions impact the PRC program
 - **Review Process:** Pending Referrals (PRC, ER/hospitalization, etc.)
 - **Scheduling Process:** Approved Referrals Pending Date of Service
 - **PO Process:** Approved Referrals with Date but no Purchase Order
 - **Claim Processing:** Claims from Vendor but not sent to FI
 - Note: There is no way to monitor from RPMS. Claims should be sent from Vendor to the FI. Not to facility/service unit. This is a major source of concern!
 - **Referral Workload:** Determines staffing levels
 - **Medical Priority Coverage/Denials:** Determines level of access & care
 - **Timeliness:** Determine how quickly referral processing is occurring

Financial: FBIS Status of Allowance Report

- UFMS based report to determine availability of funds
- Provides a “snapshot” in time
- Difficult to reproduce or match due to the multiple transactions occurring within PRC on daily basis
- Does not take into account your budget, only your availability of funds
- Available for both prior year (PY) funds & current year (CY) funds
- Compare to PRC register for general comparison, but likely won't match due to multiple PRC transactions

Financial: FBIS Status of Allowance Report

STATUS OF ALLOWANCE 080524						
FUNDS/ACCOUNT	Sum of Allowance	Sum of Obligation Amount	Sum of Undelivered Orders	Sum of Unobligated Amount	Sum of Commitments	Sum of Funds Available

Sum of Prior Year

Sum of Current Year

Financial:

FBIS Obligations Liquidation Status Report

- Total obligations of PY or CY funds obligated for specified timeframe
- PY or CY obligations combined will generate total obligations
 - Calculate weekly spend rates
 - Project end of year balances on strategic spend plan
- Trending of obligations by month allows monitoring and adjustments to obligation projections on spend plan (if needed)

Financial: FBIS Obligations Liquidation Status Report

- Excel Report can be sorted, filter, create pivot table, etc.

Financial: FBIS Obligations Liquidation/UDO Report

- Identifies total number of all prior year PRC undelivered orders
- Recommend filtering to include only those > 365 days for analysis
 - Ensures facility doesn't unintentionally deobligate funds needed by vendor
 - Hospital based charges are subject to 1 year timely filing but not PRC rates
- Rationale: Identifies the number and dollar amount of expiring purchase orders that could be de-obligated & recycled for obligation.
- **Important:** Staff should send open vendor document to each vendor, confirm from vendor it is not needed AND then de-obligate.

Financial: FBIS Obligations Liquidation/UDO Report

- Requires filtering in Excel for undelivered and > 365 days
- Report will show PRC purchase orders and UFMS purchase orders

Financial: FI Pended Claims Report

- Identifies the number & dollar amount of pended claims at the FI that need to be researched to ensure the provider is paid in timely fashion
- Available on the FI Repository Website
- Adhoc report is available to all federal sites on PRC Metrics Team Site
- Available to see all pended claims by Area, vendor, claim #, reason, etc.
- Pend Codes:
 - F02C and F07I – FI based for internal edit/review
 - P02E – provider claim is missing EOB
 - S01N – Service unit obligation needed for additional claim
 - S21D – Service unit obligation not crossing over (transmission, HUB, skeletal PO)

Financial: Other

- **PRC Register**
 - This serves as PRC's checkbook with funds allowed from Area funds
 - Not automatic; requires actions from Area Finance & PRC for "loading of funds"
 - Each PRC PO is automatically deducted from funds
 - UFMS POs require "special local" to tie up funds; requires coordination between acquisition team and PRC
 - Prior Year funds requires funds to be rolled forward as funds are deobligated
- **PRC Reconciliation** - Multi-step process that reconciles PRC register, UFMS, & Hub
- **CHEF Report** – Electronic claim submission and identification in CHEF tool; See PRC Metrics
- **Budget Analyst** – the sheer number of financial transactions easily justifies position

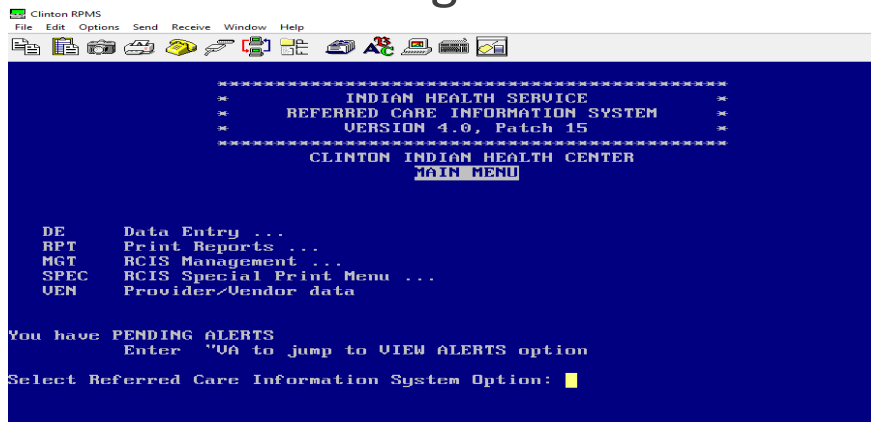

Operations: Referral Volume

- Total referrals (including ER/hospitalizations) to track/trend referral volume
- Available within Utilization Report feature

Operations: Pending Referrals

- Insight into referral processing & application of medical priorities
- Each facility will have pending referrals as normal course of operations as referrals are worked, reviewed, and sent through medical review
- Monitor date range to monitor timeliness, esp. the oldest

Operations: Denials

- Number of referrals denied by category:
 - Eligible but Care not Within Medical Priority
 - Eligible but Alternate Resource was Available
 - Patient not Eligible
 - Emergency Notification not Provided within 72 hours
 - Non-Emergency Care with No Prior Authorization
 - Patient Resides Outside PRC Service Delivery Area
 - IHS Facility was Accessible & Available
- Projects future unmet needs
- Monitor reason for denials
- Remember: Culture of “YES”

PRC Metrics (Teams)

- ORAP developed Team's Data PRC Metrics Reporting Tool
- Includes status of allowances, obligation of funds, priority levels of funding, spend rates, # of referrals processed, CHEF cases, UDOs, FI pending claims, # of denials, frequency of medical review & vacancy rates
- Data elements to assist facilities with management and oversight
- Oklahoma City and Phoenix served as initial alpha & beta tests
- Released to all Areas in February 2024 via Microsoft Teams platform
- Data has guided operational and funding decision-making

PRC Data Metric Reporting Guide

Office of Resource Access and Partnership (ORAP) at the guidance of the IHS Director is collecting key Purchase/Referred Care (PRC) Operations metrics necessary for analyzing the health of PRC operations at our federally operated Service Units (SUs). ORAP, in collaboration with the Office of Information Technology, has created a Teams Site for gathering these essential metrics.

We aim to find a solution that will automate the delivery of this data in the future. However, until that time, we request each SU to complete a data request form by the 10th of each month. Information collected will be imported into a business analytics tool for analysis that will be shared with Areas and Service Units. Furthermore, this will provide each service unit with key data element to begin monitoring and striving for improvements if necessary. ORAP is invested to partner with our federal facilities to collaboratively generate improvement that benefits our IHS staff and our patients.

Data Request:

- A. **Assignment of Responsible Individuals:** Area Purchased/Referred Care Officers are requested to collaborate with ORAP and Service Unit Leadership to designate and maintain the list of individual(s) responsible for inputting data into the Monthly PRC Report Teams Site. Please contact Sam Brewster at Samuel.Brewster@ihs.gov for access or questions regarding the PRC Data Metric Team's site. The direct link to the Team's site is: https://teams.microsoft.com/l/channel/19%3aOWbUVsEU7F_j1f4uBZuq6Tobt01SWdAgv9m00Umbpo1%40thread_tacv2/General?groupId=dbe306e6-fe77-41ab-a318-5f3229c20d50&tenantId=505de575-5ef9-45ef-b09d-1b1037c2db1b
- B. **Data Entry Requirements:** The designated individual(s) are requested to use this step-by-step guide and enter data for the previous month by the 10th day of the following month. Please contact Joe Bryant at joe.bryant@ihs.gov or John Rael at john.rael@ihs.gov if you have questions regarding a specific metric element.
 1. **Note:** Some metrics require FBIS access. We strongly encourage your PRC supervisor or reporting delegate to gain access to FBIS. Access is granted through Service Now with guidance at <https://ofspo.hhs.gov/fbis/resources/requesting-fbis-access-servicenow>.
- C. **Strategic Spend Plan:** In addition to the data metrics, we are requesting each facility to complete a strategic spend plan. It vital for each service unit to budget and monitor spending to provide for an end of year carryover between 10-25% of their annual recurring base. Once established, the Service Unit will maintain and update as necessary. Please see associated excel template/example and guide below for details. Also, below are important references:
 1. Use of PRC Funds for Staff Administering the PRC Program: <https://www.ihs.gov/ihm/pc/part-2/chapter-3-purchased-referred-care/#2-3.12B>
 2. Use of PRC Funds in Support of Direct Care: <https://www.ihs.gov/ihm/pc/part-2/p2c3-ex-d/>

Data – Referral Processing Dashboard

- In development by Oklahoma City Area/Clinton Service Unit
- Task-man “job” extraction to track referral from initiation to payment
- Designed for insight into each step of referral life cycle & identify delays
- Designed to tell leadership “how long it is taking”
- Identification of referral status & workflow for PRC department
- Visualization via Microsoft Power BI to allow all IHS access to platform and no additional license or cost
- Provides graphical view and extraction into excel file for further analysis

Data – Referral Processing Dashboard

- **Timeliness:**
 - Average Days – Referral Initiation Date to Approval Date
 - Benchmark: Average of 1-2 days for urgent priority 1s; 3-5 days for routine referrals
 - Average Days – Referral Initiation Date to Patient’s Appointment Date
 - Benchmark: Average of ~30 days; varies based upon specialty and wait times
 - Average Days – Referral Approved Date to Patient’s Appointment Date
 - Benchmark: Average of ~30 days; varies based upon specialty and wait times
 - Average Days – Referral Purchase Order Date Issued to Payment Date by FI
 - Benchmark: Use IHS GPRA benchmark of 60 days
 - Average Days – Patient’s Appointment Date to Records Review (loop closure)
 - Benchmark: TBD; likely ~60 days
- **Note:** benchmarks are tentative and not final

Data – Referral Processing Dashboard

- **Pending Referrals:**
 - Listing of all pending referrals that are not approved
 - Available for provider referrals, ER/notifications, Medicaid and IHS to IHS
- **Referral Scheduling:**
 - Listing of all approved referrals without a date in date of service field
- **Referrals without PO:**
 - Listing of all approved referrals with a date of service but no PO issued
- **Vendor Scheduling:**
 - Identification of all vendor referrals with calculation of # of referrals & average time to scheduling
