

Trade with the high performance and independent electronic order management platform from Infront.

Whether you are a small wealth management firm, a prominent asset management firm or a international investment bank or brokerage firm - you need a trading solution that is intuitive, flexible and fast.

With the Infront Professional Terminal for Traders you can execute orders electronically with the counter-parties of your choice, across asset classes. The flexibility and modularity of the platform make it easy to set up execution solutions to fit the needs of buy-sides and sell-sides alike.

Comprising information on more than 10 million instruments from 120 exchanges around the globe, as well as several leading specialist and OTC sources, Infront provides you with real-time market data, news and analytics together with secure electronic trading all on one flexible platform.

Benefits

- Fully managed
- Broker neutral
- Rapid and easy on-boarding
- Cost efficient
- Reliable and robust
- Flexible, innovative and agile
- Cutting edge technology

Focus on your business

Infront provides a fully managed, broker agnostic, robust, monitored and cost efficient trading solution. On-boarding is quick and easy. You get a customer-driven solution integrated with existing order and Portfolio Management systems. As a sell-side firm, you can deliver streaming, multi-asset global market data, real-time market views and electronic trading services to both your internal users and external clients.

Functionality

Advances multi-asset execution management

Connects buy-side, sell-side, trading venues, professionals and retail users alike

Basket trading, program trading, re-balancing portfolios, DMA, Care, RFQ, strategies and algos

Integrated solution with trading, market data, news, research, analytics

Margin validation, cash validation, net value validation, and user categorization

Integrates with portfolio systems, back office systems, order management systems, Algo providers, FIX networks

Infront Connect is compliant with the MiFID II RTS 25 clock synchronization requirements

Multi-asset trading

The Infront Professional Terminal für Traders provides access to more than 600 brokers on exchange traded products. Trade multi-asset classes and get real-time control of all trading activity in the Infront trading blotter. Functionality includes DMA, Care or Algo orders, in addition to program trading, basket trading, uploading of orders and click-trading features.

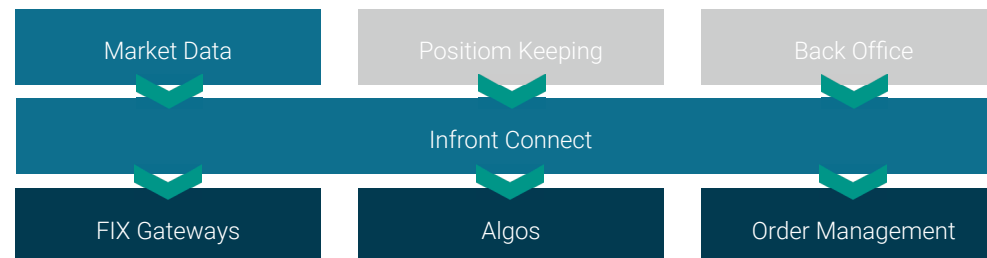

Entering orders can be done via classic entry, click-trading, uploading from files or via Infront's trading API. Combined with the Portfolio Tracker functions, you are in control of your portfolios and daily trading activity.

Infront Connect

Stay connected to order management systems, Portfolio Management systems, back office systems, Algo providers and trading networks with Infront Connect trading technology. Our interfaces include FIX, FIXATDL and XML together with standardized APIs.

Access anywhere

Follow the markets and trade from wherever you are with Infront Mobile for iPhone, iPad and Android. Get a complete overview of your investments with real-time data, and set alerts so that you can act quickly on market changes.
