

TransactionSolutions is your partner for trading solutions. Our focus is on the operation of securities trading venues in the most varied forms: whether on or off the exchange, limit trading, request for quote or matching systems – we provide customized state-of-the-art solutions. Our customers benefit from our flexible platform architecture and efficient transaction processes.

In order for market participants to be able to comply with the tougher requirements imposed by MiFID II, TransactionSolutions offers them a comprehensive range of market infrastructure solutions / trading venues:

- Bilateral over-the-counter (OTC) trading
- Trading via organised trading facilities (OTF)
- Stock exchange trading
- Data reporting services
- Orderrouting

Market participants benefit from the greatest possible flexibility with regard to the changing market infrastructure. We are successfully established in the market for more than 20 years.

TransactionSolutions is part of the Infront group and Hamburg stock exchange holds an interest of 40 %.

We provide investment brokerage services that are subject to regulatory approval of the German Banking Act (KWG).

TransactionSolutions and the TradeLink platform are uregulated by Federal Financial Supervisory Authority (BaFin).

Ecosystem of TransactionSolutions

With TransactionSolutions' modular platform strategy, trading participants have access to differently designed trading platforms via a standard interface without any additional implementation effort, and can cover their individual requirements very flexibly via the Infront trading platforms.

TradeLink

distribution system for securities trading that has been linking product providers or market makers with intermediaries since 1998. The platform connects all market participants in an N to M relationship, i.e. anyone can potentially enter into a direct business relationship with anyone else.

TradeLink is the over-the-counter

Besides the direct business transactions via the Quote Request Procedure (RfQ), trading partners also have the option of extensive and innovative limit trading. In addition to the trading hours from Monday to Friday from 7:30 a.m. to 11:00 p.m., trading in selected classes is also possible on weekends.

TradeLink is an open, neutral, and bank-independent system making it the middleware for safe securities transactions between market participants.

TradePlus

With TradePlus, our clients have access to the first BaFin-approved OTF in Germany.

TradePlus is a regulated multilateral system for trading debt securities, structured financial products, emission certificates or derivatives. By switching their off-market dealing to TradePlus, issuers and market makers can dispense with their own status as systematic internalisers, and also benefit from a uniform set of rules, a high degree of transparency, and neutral market monitoring at low costs.

X-hub

All market participants - intermediaries, order flow providers, online brokers, market makers and product providers - have access to all trading venues offered by TransactionSolutions via a single standardized interface (FIX), and therefore benefit from a modern gateway infrastructure and proven system stability.

Since the X-hub has an open platform architecture, additional on and off-exchange market accesses can be configured flexibly if required.

This provides market participants with access to a wide range of securities trading platforms via a standardized gateway, which enables them to achieve significant cost savings in line connections and in release and test management - especially against the background of the changing market infrastructure under MiFID II. Trading partners' complexity with regard to trade connections is significantly reduced.

Via the X-hub, trading participants currently have access to different trading platforms:

- TradeLink (OTC platform)
- Quotrix (Düsseldorf Stock Exchange)
- LS Exchange (Hamburg Stock Exchange)
- TradePlus (OTF)
- gettex (Munich Stock Exchange)
- MAX-ONE (Munich Stock Exchange)
- cats (OTC Börse Stuttgart)
- Spectrum (MTF IG Marktes)
- XETRA (Deutsche Börse)
- XONTRO (Deutsche Börse)

Operation of stock exchange platforms

We operate our customers' entire trading infrastructure on their behalf.

Trade modules, customer connections, onboarding etc. All services provided from a single source in line with customer requirements. Our partners benefit in this respect from our many years of experience in operating trading systems and from our secure and scalable infrastructure.

Infront Professional Terminal

The Infront Professional Terminal combines real-time global market data, news, analytics and electronic trading in one intuitive platform, putting financial markets at your fingertips.
