The Common Design Project has selected a script for use in design classes around the world during the spring of 2025. Students will be invited to complete design proposals for any/all aspects of the production, which will be curated in May/June for selection for further participation. Those designs & students selected will be invited to WSD 2025 to engage in a workshop in person (with Zoom options also available) to collaborate & expand on the design proposals. All entries will be displayed, and all entrants will be welcome to attend the final event in Sharjah
