

# DRIED VEGETABLES

## QUICK FACTS

- The vegetable processing industry in Türkiye was established **in the early 1900s** and showed significant developments during the planned development period.
- Production plants are concentrated in the **Aegean and Marmara regions** in number and capacity due to the raw materials needed by the industry being more abundant and higher in quality there.

## NATIONAL ADVANTAGE

Türkiye is one of the few countries in the world that has long harvest periods for fresh vegetable products due to its geography and it being surrounded by seas on three sides.
