

MEAT & POULTRY

QUICK FACTS

- Highly productive, healthy, and strong breeding stocks from the highest quality breeds of the world are carefully grown by expert technical staff in the **most advanced modern facilities** in Türkiye.
- Breeding is carried out in facilities equipped with **the most advanced automation systems** in disease-free and hygienic areas.

NATIONAL ADVANTAGE

Our country has set the development of livestock with a sustainable input supply as a strategic objective by considering our geographical structure, climatic characteristics, and socio-cultural production habits.

Subsidies, especially for the livestock sector in Türkiye, have considerably increased in the last decade and this increase has positive impacts on the livestock sector.
