Type KIK - 360°

Griptech Tippers and Rotators

The extremely rugged Griptech Class II and Class III tippers and rotators are built to take on heavy duty agricultural and industrial loads. The unique see-through design offers excellent operator visibility. The **RM models** have a 190° rotating capability to the left, while the **KIK models** can rotate 360° in both directions. During rotation the boxes are supported by a folding side-arm that is manually adjustable in width up to a maximum of 63". This side-arm prevents damage to the boxes and is automatically locked in open and closed positions. Furthermore, all rotators are equipped with a hydraulic valve to prevent unwanted movement while not in operation. The original forks can be fitted to the rotator's carriage with ease by sliding them on from the side. A detachable top-arm is available in case of open-bottom boxes.

RM TIPPER

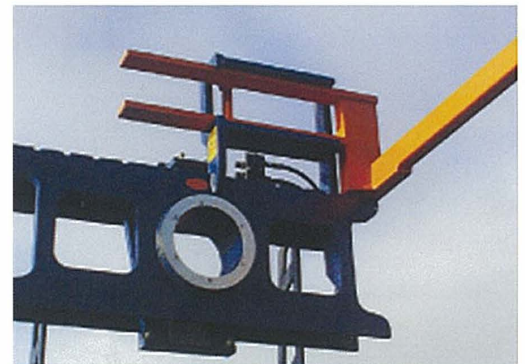

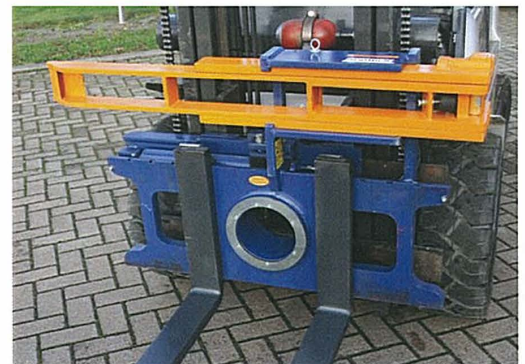

The RM models with their patented unique operator view can rotate 190° to the left using a rack and pinion system. The extra 10° rotating capability will ensure that the boxes can be emptied completely. Rotation to the right and a detachable fixed side-arm for low boxes are optional.

KIK ROTATOR

The KIK models rotate 360° in both directions. Depending on the direction, the see-through side-arm can be moved from the left to the right side with ease. The high quality direct worm-wheel drive guarantees use in intense applications. The KIK models can be equipped with a detachable fixed side-arm for low boxes.

TECHNICAL DETAILS

Model	Capacity in lbs/LC inch	Class	Weight in lbs
RM 20	4400/24	II	506
RM 30	6600/24	III	649
KIK 25	5500/20	II	572
KIK 32	7040/20	III	781
