UTILITY TROLLEYS AND LOGISTIC CARTS

DRAKKAR INTERNATIONAL designs, manufactures and distributes a unique line of **utility trolleys, stock trucks, logistic carts, retail carts and mobile replenishment system**. We work with customers to develop products that specifically meet their needs.

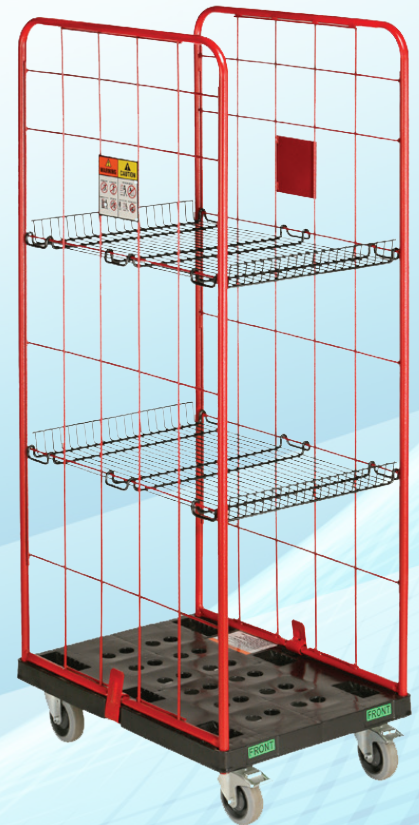

Our primary goal is to help our customers increase their efficiency in the selling process and their productivity in handling and restocking merchandize. Thus, our solutions, which are adapted to their requirements, allow them to obtain a rapid return on investment (ROI) and significant savings on inventory levels.

▼ DK-OPTI ▼

▼ DK-OPTI BULK ▼

▼ DK-BREW12 ▼

▼ DK-ROLLCO12 ▼

The RollCo12 is a vertical trolley with twelve uprights. Due to its multiple configurations, it is the ideal retailer's trolley for restocking and moving unit products intended for the replenishment of the shelves.

With its four premium swivel wheels and high-density polyethylene base, the RollCo12 is robust and versatile, with a loading capacity of over 450 kilos.

Dimensions : 812 x 585 x 1855mm
(L x W x H) : 32 x 23 x 73 in.
Load capacity : 1000 lbs (450kg)

In order to adapt to the different needs of customers, the RollCo12 has a multitude of configurations, such as six polyethylene drawers, or four drawers and four white bins each with row dividers, or 10 bins and one drawer. All these configurations boost product visibility in your back room and is the ultimate solution for restocking your products.

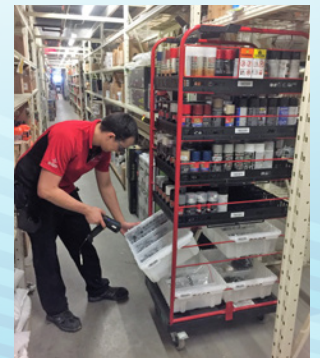

In the convenience-store field, with a bin configuration it is easy to see the products available when filling the shelves, as well as to have a continuously updated inventory.

Used in hardware store, this vertical trolley is used to transport single products, in this case paint cans. Easy to operate from the warehouse to point-of-purchase displays, it saves a lot of time.

Thanks to its drawers and row dividers, the RollCo12 is designed to easily move products of all kinds that are often in different sizes and quantities.

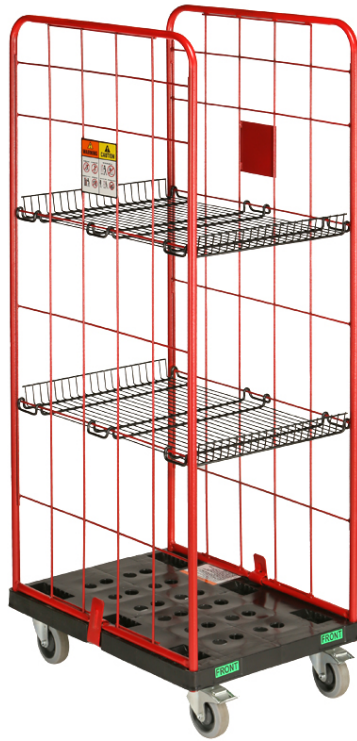

Makes it easy to find the products you are looking for in the warehouse and to know the inventory.

▼ DK-OPTI BULK ▼

Logistics trolley with a very robust and adaptable design, the DK-Opti Bulk is a bulk products mobile solution. Equipped with top-quality swivel wheels, it can move up to 500 kg of product in full cases, boxes or bags from the distribution center to the point of sale. Version with one, two or more shelves.

Dimensions : 812 x 585 x 1905mm
(L x W x H) : 32 x 23 x 75 in.
Load capacity : 1000 lbs (450kg)

Two-shelf version used in a hardware store to move products of different sizes and to fill the store shelves on a daily basis.

Three-tablet version used in the transport and merchandising of food containers.

Version, a tablet used in a pet food store.

▼ DK-OPTI PEGBOARD ▼

The pegboard version of our DK-Opti cart is used to hold "peg-able" items such as office products, snacks, gift-cards and cosmetic goods.

Dimensions : 812 x 585 x 1555mm
(L x W x H) : 32 x 23 x 61 in.

Once filled, the DK-Opti Pegboard cart contains many bags that are conveniently transported to their point of sale.

DK-BREW4

With its four drawers, dividers and stoppers, this trolley is designed as a mobile replenishment solution for micro-brewery beers.

Dimensions : 812 x 585 x 1650mm
(L x W x H) : 32 x 23 x 65 in.

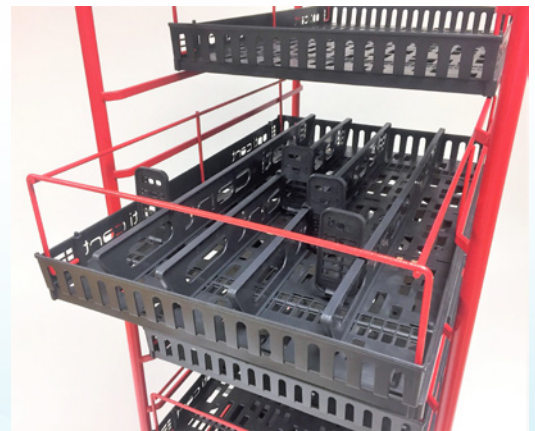

The plastic stopper prevents products from falling off when the row is not full.

DK-BREW12

As a mobile replenishment solution for micro-brewery beers, the configuration of the DK-Brew12 is in height, where it is possible to add six drawers with dividers and stoppers. What's more, its 1,000-lb. capacity results in optimum efficiency.

Dimensions : 812 x 585 x 1855mm
(L x W x H) : 32 x 23 x 73 in.

The side walls prevent the bottles from tipping sideways, forwards or backwards.

Each tablet has several dividers that facilitate the transport of single served of different sizes.

▼ DK-OPTI ▼

Used as a replenishment system for unit products, the DK-Opti comes with 5 drawers, row dividers, stoppers, and four swivel wheels. Due to its polyethylene construction, it is light and quiet.

Dimensions : 812 x 585 x 1555mm
(L x W x H) : 32 x 23 x 61 in.
Load capacity : 1000 lbs (450kg)

Retail carts with 10 white bins for moving small items, such as nail polish, blades and razors, chewing gum, chocolate, soft bars, or any other small item.

Dimensions : 812 x 585 x 1555mm
(L x W x H) : 32 x 23 x 61 in.

An extra shelf is easily installed on the DK-Opti retail cart, providing a compartment for work accessories or scanner.

The white bin, which can be used on a conveyor because it has a non-slip bottom, comes with two dividers.

APPLICATIONS

In pharmacies, the DK-Opti cart is used to transport the overflow from the warehouse to the various sales sections. Whether it is shampoos, as in this case, a huge amount of time is saved in terms of travel and inventory.

In a food store, here in a Rachelle-Béry, the DK-Opti cart ensures the easy move of single products, which saves a lot of time.

In pharmacies, the DK-Opti trolley will replace the fixed shelf for unit products.

All products in the Rachelle-Béry warehouse are placed on fixed shelving in rows and in units. A lot of time must be spent handling and transporting these products.

IN THE DISTRIBUTION CENTER AREA, THE TWO DIFFERENT TYPES OF LOGISTIC STOCK TRUCKS ARE DESIGNED TO NEST TOGETHER IN ORDER TO SAVE ON SPACE AND FREIGHT.

▼ **DK-ROLLCO CARGO ▼**

This extremely strong, large, sturdy and durable 3-sided logistics trolley features folding sides for nesting trolleys together. This nesting function saves warehouse space.

Dimensions : 840 x 720 x 1735mm
(L x W x H) : 33 x 28 x 68 in.
Weight : 19,4 kg
Wheels : 5 X 2 in. (127 X 50mm)
Loading capacity : 400 lbs (182kg)

▼ **DK-ROLLCO TYPE Z ▼**

Two-sided logistics trolley that has no back and can transport unusual objects. Trolley with a raised base to allow nesting with others and minimize truck space.

Dimensions : 870 x 760 x 1835mm
(L x W x H) : 34 x 30 x 72 in.
Weight : 19,4 kg
Wheels : 5 X 2 in. (127 X 50mm)
Load capacity : 400 lbs (182kg)

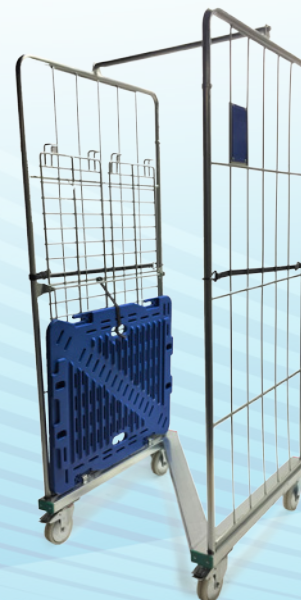

The carts nest into one another to facilitate the return to the distribution centre, saving space in the warehouse and at the retail location.

Its Z-shaped metal base allows several trolleys to be nested and facilitates the return of the stock truck to the warehouse.

The two sides of the trolley fold back on themselves as well as the base and shelf, making it very compact.

The polyethylene base and metal shelf can be raised on the sides.

CUSTOM MADE PRODUCTS MANUFACTURING

▼ DK-PILLCART RX ▼

In the field of pharmacy, this trolley is designed for the transport and storage of display cards. It has four drawers and eight card holders.

▼ DK-ETAL2T BACS ▼
