

Please stay tuned for more live days in the near future. The SaskTrade Showcase is an innovative virtual trade show highlighting products and services from Saskatchewan's world-class suppliers. Until the live days start again, you may browse the exhibit halls and view 34 informative and engaging webinars on emerging industry trends and technologies.

Agriculture and Agri-Food Webinars	Agriculture Technology & Equipment Webinars	Energy & Mining Webinars	Construction & Public Works Webinars	Information Technology, Forestry & Professional Services Webinars
<p><b>2021 Food Industry Trends: Global Overview with a Saskatchewan Flavor!</b></p> <p>Understanding new trends in food and the retail industry is an important tool across the value chain to help food companies develop a better understanding of their customers and consumers. Hear how COVID-19 changed consumers shopping behaviors, emerging food trends coming out of 2020 and take a closer look at which trends will continue on into 2021.</p>	<p><b>Saskatchewan – World Leader in Direct Seeding/Conservation Tillage Practices and Residue Management</b></p> <p>Saskatchewan has long been a leader in direct seeding and conservation tillage practices in large scale, dryland farming, come learn about the technologies and agricultural practices that keep Saskatchewan at the forefront.</p>	<p><b>Soft Rock Mining: Techniques and Technology</b></p> <p>Underground potash mines are corrosive environments. This webinar will feature some of the technology that is used underground to effectively mine potash, maintain safety for the workers, and keep the machines running with limited downtime.</p>	<p><b>No More Shovels: An Innovative Solution for Pothole Patching</b></p> <p>Fixing potholes is no easy task and usually involves shutting down lanes for an extended period of time while multiple workers fill them by hand. Join this webinar to learn about an innovative solution: The Python 5000+. This self-propelled machine allows for a single user to quickly fix potholes and continuous cracks from the safety of the cab, in nearly all-weather conditions.</p>	<p><b>Saskatchewan Innovations in HealthTech</b></p> <p>From mobile health to smart absence management solutions, learn how technology is changing face of healthcare.</p>
<p><b>Food &amp; Agriculture Webinars: - Latest in Saskatchewan Organic Sector</b></p> <p><b>- Plant Based Products: Hemp &amp; Hemp Ingredients</b></p> <p><b>- Latest in Saskatchewan Food and Beverage Industry</b></p> <p>The demand for organic and plant-based food products is growing at an exponential rate, and Saskatchewan producers and exporters are well positioned to help meet this demand. Hear about the latest development in Saskatchewan organic sector, the latest in plant-based products with a focus on hemp, hemp ingredients and its applications.</p>	<p><b>Technologies for Mechanical Weed Control</b></p> <p>Mechanical weed control is not anything new, as farmers have been using various types of equipment to control weeds for centuries, and for organic farmers mechanical weed control remains the only option. Growing market and consumer pressures have brought methods for mechanical weed control to the forefront. Learn about some new technologies that are available to help make mechanical weeding more efficient and effective.</p>	<p><b>How Technology Has Enhanced the Saskatchewan Oil &amp; Gas Industry</b></p> <p>Oil wells, pipelines and other assets are spread across Western Canada. It isn't practical for humans to be present 24 hours a day. Join this webinar to learn how technology, such as software and artificial intelligence, is saving producers time and money.</p>	<p><b>Technology Solutions to Preserve and Optimize Assets: Bridges, roads, water networks and other assets are invaluable to a city and require long-term planning solutions.</b> IDS Infrastructure Data Solutions offers the industry's most advanced solutions for developing optimal network-level long-term asset preservation plans. Learn more about how this software is guaranteed to generate truly optimal risk-based preservation plans for your city or town.</p>	<p><b>Saskatchewan's Synchrotron Technology and Its Applications</b></p> <p>The Canadian Light Source is a national research facility in Saskatchewan, one of the leading synchrotron facilities in the world. A synchrotron is a source of brilliant light that scientists can use to gather information about the structural and chemical properties of materials at the molecular level. The seminar will provide you an overview about Saskatchewan' cutting edge synchrotron technology and its applications for commercial accesses.</p>
<p><b>Plant Protein: What You Need to Know! – The Latest Trends and Opportunities</b></p> <p>The interest in plant protein is growing at an exponential rate, large investments are announced regularly in this sector, and new products are hitting the shelves almost every week. Hear about the latest trends, opportunities, food applications, and consumer/market insights in plant protein and the latest research in pea protein that is happening at the Crop Development Center at the University of Saskatchewan.</p>	<p><b>Saskatchewan Tank Monitoring Innovations</b></p> <p>From fuel and water to fertilizer storage, tank monitoring technology is rising to new heights in Saskatchewan. This webinar will feature insight into how Saskatchewan innovation is driving new and innovative solutions in tank monitoring from North Star Systems, a leading designer of product monitoring technology, software and solutions.</p>	<p><b>Mining and the Environment – A Crucial Relationship</b></p> <p>Mining projects have a significant impact on the environment, both during and after the project. Mining operators understand this and are always looking for new ways to ensure their projects are not leaving lasting negative effects on the environment. Attendees will learn how microbiology, geomatics, semi-passive water treatment and other methods can be utilized before, during and after mining projects.</p>	<p><b>Cover More Ground – High Performance Cutters and Mowers for your Roadside and Greenspace Needs</b></p> <p>Schulte Industries has been around for 108 years and has been building high-quality brush cutting, cleaning and snow clearing equipment since the 1940's. This webinar will showcase some of their latest products and explain how these can benefit your city, town or municipality.</p>	<p><b>The Future of Sports: How Technology is Changing the Game</b></p> <p>Learn how mobile technology and cloud computing is changing the delivery of sporting from grassroots sporting associations to professional league organizations.</p>

<p><b>Asia Trade Conference Webinars: - Endless Opportunities – Saskatchewan Agricultural Horizon - Plant Protein Industry Overview and Trends</b></p> <p><b>- Global Food Trends Outlook</b> Hear from James Kettle, Executive Director at Saskatchewan Ministry of Agriculture to give you an overview of the Province’s agriculture and agricultural food sector and supply capacity. Yadu Dar, Director of Verdient Foods will speak on the exciting facts and future of the plant protein industry. Finally, Ken Theriault, President of COSTCO Japan, will provide his market insights on retail food sector and speak on the global food trends.</p>	<p><b>How Innovations in Livestock Equipment and Feed Can Impact the Cost of Production</b></p> <p>In an always changing agricultural environment, farmers need to make strategic decisions on their livestock equipment and feeding practices to keep their business profitable. Feed costs generally represent the greatest portion of the overall cost of livestock production, and producers can greatly benefit from technologies that can lower them. Learn about innovative equipment and practices to get the best results in feeding livestock.</p>	<p><b>Innovations in Wastewater and Tailings Management</b></p> <p>Did you know that bright light from a synchrotron can help detect lead and arsenic in tailings ponds? Or identify barium and nitrogen in EOR oilfield projects? Or that electro kinetic systems can be used on site to remediate contaminants from wastewater, soil and groundwater? This webinar will highlight groundbreaking technology in Saskatchewan that is being used in tailings and wastewater.</p>	<p><b>Emerging Technologies for Urban and Rural Municipalities</b></p> <p>Learn how LoRa networks are empowering sensors for GPS based asset tracking, crime prevention, environmental monitoring, agtech, and smart city use such as hydrology and soil moisture monitoring. Primary benefits of these new technologies include reduced costs compared to conventional technology options in use, improved efficiencies in operations, reduced crime rates, and positive environmental impacts such as climate data, soil remediation, and water conservation.</p>	<p><b>Taking Your Business to the Next Level: Saskatchewan’s Advanced Business &amp; Technical Training Solutions</b></p> <p>From growing a business to building technical expertise, today’s leading businesses need partners that can help them develop their people and businesses. Tune in to hear from one Saskatchewan company that is on the forefront of delivering innovative business training and capacity building.</p>
<p><b>New Crop Update: Cereal Grains &amp; Special Crops</b></p> <p>Saskatchewan is known worldwide as a consistent and reliable supplier of safe, high-quality grains, oilseeds, pulses, livestock and agri-food products. The new crop update would cover the market outlooks and demand for wheat, durum, oats, lentils and peas. This lineup of speakers will present on the current state of cereal and pulse industries and current opportunities.</p>	<p><b>Innovations in Soil Management Using SWAT Map’ing Technology</b></p> <p>Tracking and managing soil health is an important job for producers looking to get the most out of their crops. This webinar will go over what soil health is and demonstrate advancements in both tracking and managing soil health and what new technology is out there to help producers get increased quality and yield from their crops.</p>			<p><b>Streamlining Business Processes Using Technology</b></p> <p>Over the past year, 7shifts has introduced exciting new tools that help restaurants save time by having their restaurant data all in one place, alleviate headaches around scheduling and budgeting and ensuring employees are healthy safe. Learn how 7shifts can help you save labor costs and streamline your business processes. ServiceBox helps service businesses organize and manage their end-to-end workflow. This presentation will show how an integrated system that focuses on business efficiency can improve the bottom line and help companies grow.</p>
<p><b>Wheat – Value Proposition, Quality, Consistency and Competitiveness &amp; Canola – A Sustainable Source of Healthy Oil and Premium Protein</b></p> <p>The global wheat market is becoming increasingly competitive, this presentation would explain the advantages of usage of Canadian wheat to the traders, millers and bakers around the world. Canola oilseed is packed with healthy oil, protein and potential, in a few</p>				<p><b>Overview of Saskatchewan Forestry Sector</b></p> <p>Over half of Saskatchewan is forested and forestry is northern Saskatchewan’s largest industry. The Province has a well-established and competitive forest industry, with leading-edge technology. There are seven large forest products manufacturing facilities producing lumber, pulp and panels, and over 210 small forest businesses</p>

<p>decades, canola has become one of the world's most important oilseeds and one of Canada's leading crops. The webinar would highlight the quality and consistency of supply along with explain the milling advantages and baking and processing advantages of both commodities.</p>				<p>producing a variety of forest products. The seminar will provide an overview on the forestry industry of the Province.</p>
<p><b><i>Emerging Opportunities for the Use of Pulses as Ingredients</i></b> The consumer around the world has been increasingly looking for safe and high-quality foods and one of the major breakthroughs to achieve this has been the innovations in ingredients, There has been a tremendous development undergoing in the Canadian pulse industry in pulse ingredient and product developments to successfully utilize various pulses. This webinar would discuss some of the new ingredient and product developments using pulses. The main uses for Canadian pulses after noodles are baked goods, snacks, sprouts, and sauces.</p>
