

**SESSION**  
**Late Model Hybrid Systems**  
**DESCRIPTION**

Hybrid vehicles have been around for a number of years, but these vehicles still bring a lot of mystery to technicians. This class will teach you the basic operation of a hybrid vehicle. Real world case studies will be used to show how to diagnose various hybrid faults.

The learning objectives for this class are:

- Identify Hybrid components
- Describe Hybrid Operation
- Analyze scan tool data to diagnose hybrid faults

**Educator: Phil Fournier**
