

SESSION

“Virtual Hands-On” Digital Inspection Experience

DESCRIPTION

Digital inspections are here and are the key to building customer confidence and your profits at the same time. During this class, you will be given a “Hands-On” experience via an actual digital inspection.

The class will cover the use of digital inspections in your shop; show you how easy it is to build inspections, gain customer trust and increase sales; and introduce you to the power of using digital inspections that will change your shop for the better.

Immediately following this class, join us at our virtual expo booth so we can guide you through a demo using our software and to learn more about a webinar being offered a week after the X50 show.
