

## SESSION

### A.D.A.S. Awareness for Service Consultants

#### DESCRIPTION

Vehicles possessing Advanced Driver Assistance Systems (ADAS) are becoming more & more popular and at the same time increasing in complexity, which of course is increasing the demands placed upon service providers. This session is designed to increase your situational awareness around service requirements and perhaps discover service opportunities.

Topics discussed:

- The road to autonomous vehicles
- Perception systems
- Visual cues
- Service requirements
- Documentation

This is a brand-new class and will cover a lot of ground and introduce best practices you can adopt immediately.
