

Emergency Child Care & Technical Assistance Center:

“CCAOA recently launched this new initiative to support the entire child care community — CCR&Rs and other system-level leaders, providers, families and employers — during the COVID-19 crisis, and beyond.

In the midst of funding and supply challenges compounded by COVID-19, the Center provides training, technical assistance and resources to:

- Assist CCR&Rs and other systems-level leaders in understanding the needs of and supporting child care programs now, during, and after the pandemic
- Enhance CCR&Rs’ abilities to respond to COVID-19 and demonstrate their strength
- Equip child care providers with information about financial supports and business operations, and connect them with CCR&Rs
- Assist families in accessing financial supports, making informed child care choices, and connecting with CCR&Rs
- Work with CCR&Rs to connect essential businesses and their employees to available licensed child care programs
- Assist employers with emergency and other child care needs”
