

State of the Art: Health Care IT Project Management

Wednesday, July 14

Summer Institute in Nursing Informatics *Celebrating 30 Years*

July 14 from 12:30 p.m. to 5:00 p.m. (offered virtually)

The purpose of this preconference is to provide a practical “State of the Art” presentation of modern healthcare IT project management. The target audience is broad and will span novices to experts. Presenters are practicing experts, clinicians, and executives. Highlights include:

- Key components of successful healthcare IT projects (e.g., mitigating project risks)
- Multidisciplinary project management (e.g., working with a diverse team)
- Selecting the best project management method/tools for a project (e.g., waterfall vs. agile)
- Healthcare IT project management from diverse perspectives (e.g., non-clinician, clinician, executive).
- Real world project examples (e.g., health application specific and large multidisciplinary projects).

Learning Outcome:

100% of participants will identify at least one project management tool they will implement into their practice.

Presenters:

David W. Li, MBA
Director, Clinical Information Systems
Johns Hopkins Health System

Jennifer C. Baron, MSN, RN
Epic Systems Development Manager
Johns Hopkins Health System

Shannon Fearday, MS, RN
Senior Clinical Business Analyst
Michigan Medicine

Carleen Penozza, MHSA, BSN, RN
Chief Nursing Informatics Officer
Michigan Medicine

Fees:

Preconference Only: \$250 (includes CE)

Preconference and SINI: \$840
