# Our Focus Areas

## Gender

We want to improve and support female participation in under-represented industries.

## Equity and Achievement

We want to encourage employer-led traineeships and apprenticeships as a way to improve participation and achievement of priority learner groups in NZ, and work with business to sustain these outcomes.

## Employer Advisory Services

We want to support employers to train effectively, using workplaces as sites of learning, utilising skills productively and getting the most from their commitment and investment in training.

## Degree and Graduate Apprenticeships

We want to address policy barriers and improve connections between higher education and industry through work-integrated learning.

## What is GAN?

Headquartered in Switzerland and established in 2013, the Global Apprenticeship Network (GAN) is a global, business-driven alliance through which private sector companies, employer federations, international organisations and thought leaders work together to build linkages between education and employment through work-based learning initiatives and apprenticeships.

## Why GAN New Zealand?

GAN New Zealand has been established to strengthen organisational engagement in apprenticeships, while sharing global perspective and best practice in the areas of apprenticeships, mentoring and on-the-job training.
