

Dr. Tauni Lanier, Sustainability Director, World Wide Generation

Environmental Economics (PhD.), University of St. Gallen, Switzerland

She is a recognised expert in the fields of sustainable finance and sustainable development in the finance sector. Previous publications include: Environmental Business, Sustain Magazine, and FT. She is media savvy and has been asked to guest lecture at universities in France, England, Singapore and the USA.

Tauni is an investment banker and has worked in Germany, Switzerland, Singapore, the USA and France for organisations such as JP Morgan and Dresdner Kleinwort Benson on the debt side and in structured finance. She became the first managing director of the DJSI. She has worked with such organisations as WBCSD, the Global Reporting Initiative, and corporate responsibility and corporate governance ratings, and IMPACT2030. She founded and runs EcoCapital partnership, combining experience in environmental and corporate finance to create a unique solution based business in non-traditional risk assessment and investment impact in investment decisions on the forefront in investment advisement, structuring, and due diligence in climate change, impact investing, social justice and environmental asset project development. Recently she has experience in providing of common sense alternatives to the conventional technology vendors in the primary areas of waste management, renewable energy, water security, food and agriculture, with application to Government policy makers as well as corporate decision makers.

She currently is the Sustainability Director at World Wide Generation (WWG). WWG is the technology partner for City of London Corporation and works with the UK Government.
