Careers with a future
be a part of Engineering Construction

www.ecitb.org.uk

Want to be a pioneer?

Are you passionate about what you do?

Do you look for excitement and variety in your job? Working in engineering construction can give you that and more. From apprenticeships and graduate roles through to senior management positions, the engineering construction industry has something for everyone.

Engineering construction companies are responsible for the design, project management, construction, maintenance and decommissioning of some of the UK's most important infrastructure projects. They help to provide our electricity and fuel, plastics, cosmetics and medicines, as well as food, water and waste facilities. The skills needed are diverse and in demand.

“

“I thought there would be too many obstacles, but women can be successful in engineering.”

Angela Hawthorne
Electrical Technician,
Amec Foster Wheeler
