# IATF FOREWORD

**Mrs. Stacey Susa-Pinto**  
Chief Executive Officer

Namibia Trade Forum

---

The Intra-African Trade Fair (hereafter IATF) was launched and first took place in December 2018 at the International exhibition Centre in Cairo, Egypt.

The IATF is a bi-annual event organized by the African Export-Import Bank (Afreximbank) in collaboration with the African Union and the AfCFTA secretariat. The IATF was necessitated by the low levels of Intra-African trade and as such was created to provide trade and market information; connect buyers and sellers across the continent and be an enabler for Intra-African trade. The theme of the 2018 conference was 'Intra-African trade as an engine for development' and specifically looked at the challenges and opportunities of the African trade market. The 2018 IATF could not have been convened at a more opportune time as it was preceded by the signing of the African Continental Free Trade Area (the AfCFTA) in March 2018. The 2018 IATF saw US\$32 billion realised from trade and investment deals, 2500 conference participants, 1000+ exhibitors and representation from 45+ countries across Africa.

Fast forward to 2021, the African continent is yet again poised to host the biggest enabler for Intra-African trade in Durban, South Africa from 15 – 21 November 2021.

With the AfCFTA as the backbone of the IATF, it is encouraging to note the laudable progress made so far. At present, 41 countries have signed and ratified the AfCFTA, great advancement made on tariff offers and over 80% of the rules of origin concluded – we are much closer to the end of an arduous start to integrating our markets and finally starting to see the dawn of a new era of trade for the African continent.

The 2021 IATF in Durban, South Africa is set to bring in about US\$40 billion in trade and investment deals, 10 000 visitors and buyers,

1100 exhibitors and over 5000 conference participants from 55 countries across the continent. It is clear that the IATF continues to grow and create bigger opportunities for African businesses. The theme for the 2021 IATF is: 'building bridges for a successful AfCFTA' with a strong focus on recognising growth opportunities and Intra-African cross border trade and investments.

At the heart of the African business landscape and growth, are the Small – Medium enterprises widely known as SMEs. SMEs make up about 80% of Africa's business and employ about 80% of the continent's population. SMEs are also represented in an array and diverse range of business from manufacturing, digital trade, services, finance, logistics, health to mention a few. It is therefore undeniable the potential that lies particularly with this grouping of business.

However, even though garnered with such potential, SMEs still struggle to scale-up due to varying barriers that make it difficult for them to access bigger markets. It is with this understanding that key instruments such as the AfCFTA could really make the difference for SMEs in Africa. The AfCFTA, once fully operational will offer continental market access at reduced tariffs, regional integration with easier access to raw materials and crucially African trade finance supported by institutions such as Afreximbank and others.

In Namibia, SMEs, as you will note reading this magazine, are represented in various sectors which are key to our growth and innovation as a nation. SMEs in Namibia account for 70% of of business and operate mainly in the manufacturing sector, processing, financial solutions, digital trade, logistics and energy. It so happens that these are the sectors that the continent is looking to for growth and as facilitators for regional value chains. And so showcased in this magazine is an opportunity to do business with some of the most forward-faced businesses the region has to offer. This is of course backed up by the fact that Namibia enjoys such strategic geographical positioning that makes it easier to access wider southern region markets through our trade corridors; using Namibia as a base

for manufacturing and distribution. This IATF magazine showcases the best we have to offer from some of our most innovative SMEs in Namibia. The B2B and B2C opportunities presented in this magazine could truly go a long way towards establishing regional value chains at SME level and improving the scalability of SMEs not only in Namibia but across the continent.

We would be amiss if we did not acknowledge the peculiar impact that Covid-19 has had on SMEs across the continent. For most, it has meant closure, for others further down-scaling on an already limited resource pool. This only makes even more urgent, the task of helping SMEs build-back better by means of convenings such as the IATF. With SMEs at heart of Africa's growth, the IATF continues to serve as a critical enabler for development at the grassroots, where it matters the most.

I remain thankful to the Namibia Investment Promotion and Development Board (NIPDB) and the Ministry of Industrialisation and Trade for continuing to champion the growth of SMEs in Namibia. The NIPDB has shown exemplary leadership in this space and has championed the preparatory work to showcase SMEs at IATF level.

A tremendous thank you also goes to the African Union, the AfCFTA secretariat and Afreximbank for launching and continuing to convene the IATF. This year, we'd like to thank the Government of South Africa for hosting us in Durban, Kwa Zulu Natal.

To end, I'd like to encourage us all to keep the African dream alive and optimistic for a more integrated African market.

We look forward to welcoming you to Namibia as we partner to make Africa great.

# FOREWORD

**Ms. Nangula  
Nelulu Uaandja**

**Chairperson & Chief Executive  
Officer of NIPDB**

**Targeted Support for Development And  
Scalability of the MSME Sector**

**For Namibia Expo 2020 Dubai  
MSME Catalogue**

The rate at which a country's economy will grow is substantially determined by their ability to integrate with the national and global ecosystem.

**It is crucial they expand capacity to maintain sustainability** and also develop the ability to transition into an innovative, yet still relevant, economy.

MSMEs play a key role in the transition of both developing and established countries. These businesses constitute a major source of employment and generate significant domestic and export earnings. As such, MSME development emerges as a key instrument in employment creation efforts.

To develop MSMEs effectively and sustainably requires a public - private collaboration to establish and promote conducive microeconomic business environments, sound macroeconomic policies through simplified legal and regulatory frameworks, good governance, abundant and accessible finance, suitable and sufficient infrastructure, skilled labour as well as competent public and private institutions. Enhanced public - private dialogues and partnerships with key stakeholders are essential for effective tailoring and prioritization of support measures as well as ensuring access and integration into local, national, and global markets to support and create opportunity for all Namibian MSMEs.

These ambitions were boosted with the establishment and operationalisation of the Namibia Investment Promotion and Development Board (NIPDB) in early 2021. This semi-autonomous non-profit association in the Presidency is mandated with a primary objective of promoting Namibia as a lucrative investment environment both locally and internationally. The Board is also mandated with the role of coordinating Micro, Small and Medium Enterprise (MSME) activities across all levels of the Namibian economy.

A major objective of the NIPDB is to sustainably fast track the development of the sector by enabling an environment that equips small businesses to access opportunities which continue to drive the economic growth we collectively work towards.

It is with the above said that the NIPDB undertook to create this catalogue, with the financial support of First National Bank, to ensure a platform for MSMEs virtually and through print media to reach all of the world. Namibia has the very best, resourceful and innovative Micro, Small and Medium enterprises, with great potential to scale to the world.

Our wish is that this MSME catalogue will allow for business to business networking opportunities which, through dialogue and smart partnerships between the world and Namibian MSMEs, can spur collaboration and opportunity.

# VOTE OF THANKS

## Mr. Dino Ballotti

Executive: MSME Development,  
Innovation and Acceleration  
of NIPDB

For Namibia Expo 2020 Dubai  
MSME Catalogue

## The largest contributors to economic activity in successful economies across the world are micro, small and medium enterprises (MSMEs).

These businesses maintain a vital position in meeting and resolving social-economic challenges such as unemployment and poverty, enabling direct employees and others in the supply chain to benefit from improved prospects. The significance of MSMEs is portrayed by the point that all through the world over 95 per cent of enterprises are in the form of MSMEs (Aksoy, 2017).

Like those from advanced and emerging markets around the world, MSMEs are a major force for Namibia's financial development, yet they face real challenges in the form of lack of knowledge and financial support. Few have strong R&D capacities, with many companies facing barriers to innovation along these lines. It is expected that product innovation can be a mechanism through which MSME collaboration with industry can positively and significantly impact business performance. Evidence demonstrates the scale and commercialization of the sector can be achieved through the development of smart partnerships.

The rise in globalization has fostered a greater competitive atmosphere worldwide, with fast technological shifts and shorter product and innovation lifecycles. Countless organizations, especially small and medium-sized businesses, focus on innovation as the main driver of sustainable competitive advantage. Small and medium-sized enterprises, as they are progressively perceived as crucial innovation contributors, assume universally a significant role in national economies, and this is no different in Namibia.

This catalogue is intended to connect Namibian micro, small and medium enterprises (MSMEs) to the world, showcasing our countries various sectors and industries.

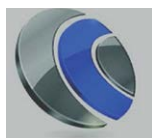

It is our sincere optimism that you, the reader, may reach out to some of Namibia's most innovative and progressive micro, small and medium enterprises, to further explore collaboration and opportunities for scale and partnership.

## ACCOUNTING & BOOKKEEPING

# Spotlight on Entrepreneurs: Namibian – German Technical Cooperation for Sustainable Economic Development

**N**amibia or the Land of the Brave, as it is also known, is a land full of resources, from minerals, arable land, wildlife, gemstones and plants with healing and nurturing properties, to digital infrastructure fostering innovation. This doesn't begin to focus on its best resource, its people; truly a resilient and resourceful people full of entrepreneurial spirit. The country also has an enviable startup ecosystem that is producing real viable technology driven and innovative businesses. GIZ has been working on sustainable economic development in Namibia on behalf of the German Federal Ministry for Economic Cooperation and Development (BMZ) since the country gained its independence in 1990.

Namibia's Ministry of Industrialisation and Trade (MIT) together with the German Development Cooperation's implementing agency GIZ through its Promotion of Business Advisory and Economic Transformation Services (ProBATS) programme and the incubator programme for startups, StartUp Namibia, are showcasing just how creative, industrious, innovative and inspiring these SMEs and startups are at this year's Dubai Expo.

Namibia's economy is starting to leverage its natural and precious resources and people, enhancing and processing them to make the economy grow for the benefit of all Namibians.

Small businesses and startups have realised this and are creating opportunities, new businesses and empowering themselves through owning the value-chains. The Ministry and its partners have been a major driver, engaging, enhancing and stimulating ownership of the value-chain of these sectors to Namibians. As well as creating a conducive ecosystem for startups, these are the businesses that are proudly showing what Namibia has to offer in Dubai!

Please come and see just what the Land of the Brave is capable of, and you might just be inspired to partner or support these businesses. Come and support what was grown, manufactured and conceived in Namibia and take it global.

**For enquiries, please contact:**

**StartUp Namibia**  
Mrs Anna Vambe at
