The next step in the CME process requires the following action: Please login to the Platform and click on "Upload Pre-Activity Info" in the To-Do column corresponding to your educational activity on your My Activities tab.

You will then have access to the following items and related instructions, which are required to be submitted through the Platform by 03/22/2023

- Evaluation Form
- Disclosure Form Template and Disclosure Summary
- Disclosure List (Insert)
- Letters of Agreement (LOAs) (if applicable)
- Credit Claiming System Testing Template (if applicable)

Please do not select "Submit" at the bottom of the Pre-Activity Information step until all items are complete. You may "Save As Draft" on the left-hand column of the page instead, to continue making edits until all items are finalized.

Please note that the attached documents have been customized specifically for your educational activity and cannot be found on your Platform:

- Program Requirements template: Includes components that must be included in the program book/program materials, due for approval through the Platform by **03/22/2023**.
- CME Certificate template: Only MD/DO learners are eligible to receive the CME Certificate, after submitting the evaluation form
- Completion Certificate template: Non-MD/DO learners may receive a Completion Certificate

After submission of the required pre-activity components, you will receive an email regarding the status of the items listed above. **Failure to submit the required components may risk future accreditation of educational activities. While you are not required to submit all educational/scientific content (i.e. full slide decks from all presentations, abstract books, recordings from internet-based activities, etc.) to CPDA for review/approval, please retain this information in your records for six years, in the event that your CME file is selected by the ACCME for a file audit.**

The following items related to post-activity requirements will be also be available to download with instructions, in order to prepare for future deadlines:

- Attendance List: Due on 04/29/2023
- Post-Survey: Must be distributed to all learners by 05/27/2023

The Final Report (Due on 07/28/2023) is the final step of the CME process. The Final Report requests the compilation of attendance, evaluation, financial, and post-activity survey data, as well as required supplements, in order to close the CME activity file. Further instructions will be available through the Platform after your educational activity. **Please note: For PartnerCME Joint Providership activities, failure to submit the Final Report by the deadline will result in additional late fees (<https://www.facs.org/education/accreditation/jpp/fees>) depending on the tardiness of the submission.**

As a courtesy, you will receive an email reminder as each deadline approaches. In order to complete the step, log into the CPDA Platform and click on the blue text in the last column corresponding to the educational activity on your "My Activities" page. More information and instructions pertaining to the upcoming requirement will be provided on the page.

Please contact CPDA@facs.org with any questions you may have throughout the process. Thank you.
