UNA EUROPA webinar

The role of academia in transition to sustainable food systems

Moderation: Robert van Otterdijk

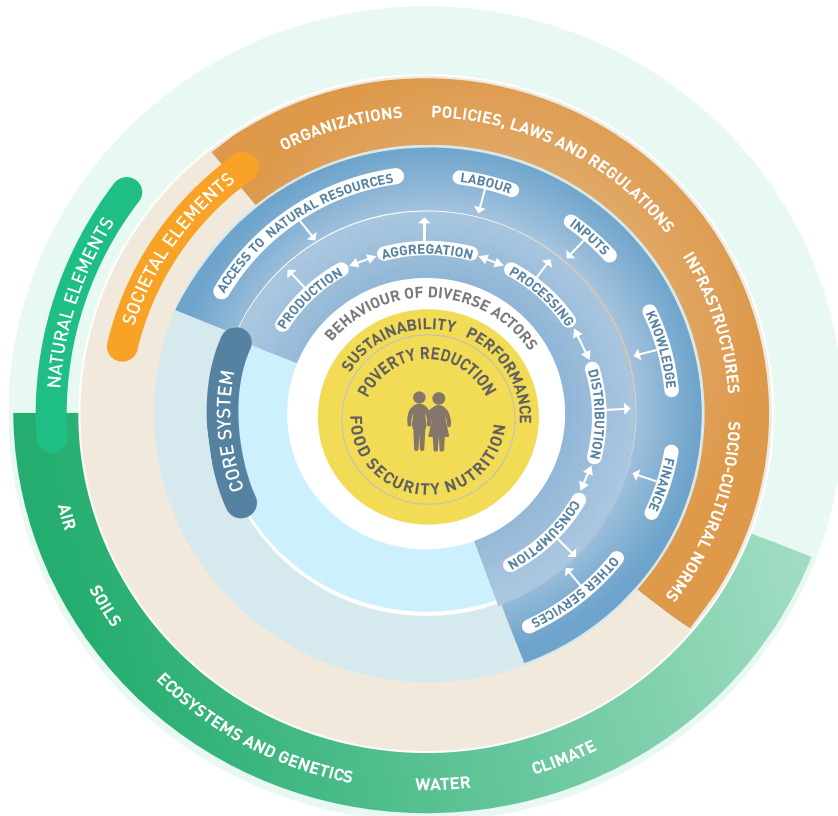

Agro-Industry Officer, SAVE FOOD - Initiative on Food Loss and Waste Reduction

FAO Regional Office for Europe and Central Asia

Food System

The **interconnected set of actors and activities** involved in the production, aggregation, processing, distribution, consumption and disposal of food products, as well as the **broader** economic, environmental and societal **context** that is **coherently organized** with the overall **function/ purpose** to provide food and nutrition security for all people.

Sustainable Food System

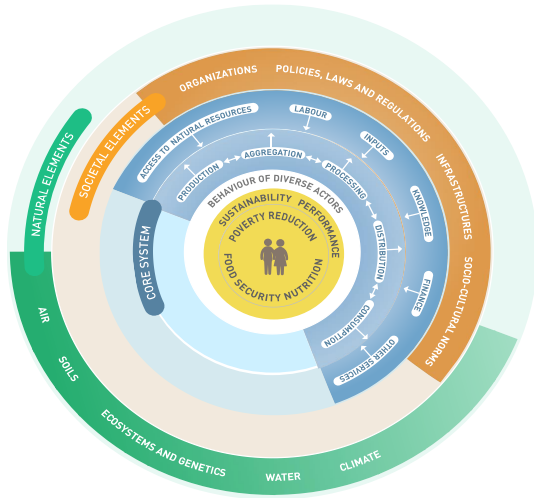

Food System that does not compromise the economic, environmental and societal bases for providing food now and for future generations.

It is resilient to external shocks in the economic, environmental and societal context.

Sustainable Food System

An SFS approach measures, analyzes and improves the economic, environmental and social impacts of activities and interventions in the food system.

First: Analyze and understand the Food System

Sustainable Food System

First: Analyze and understand
the Food System

Paradigm:

Structure – Conduct – Performance
of the FS, and Feedback Loops

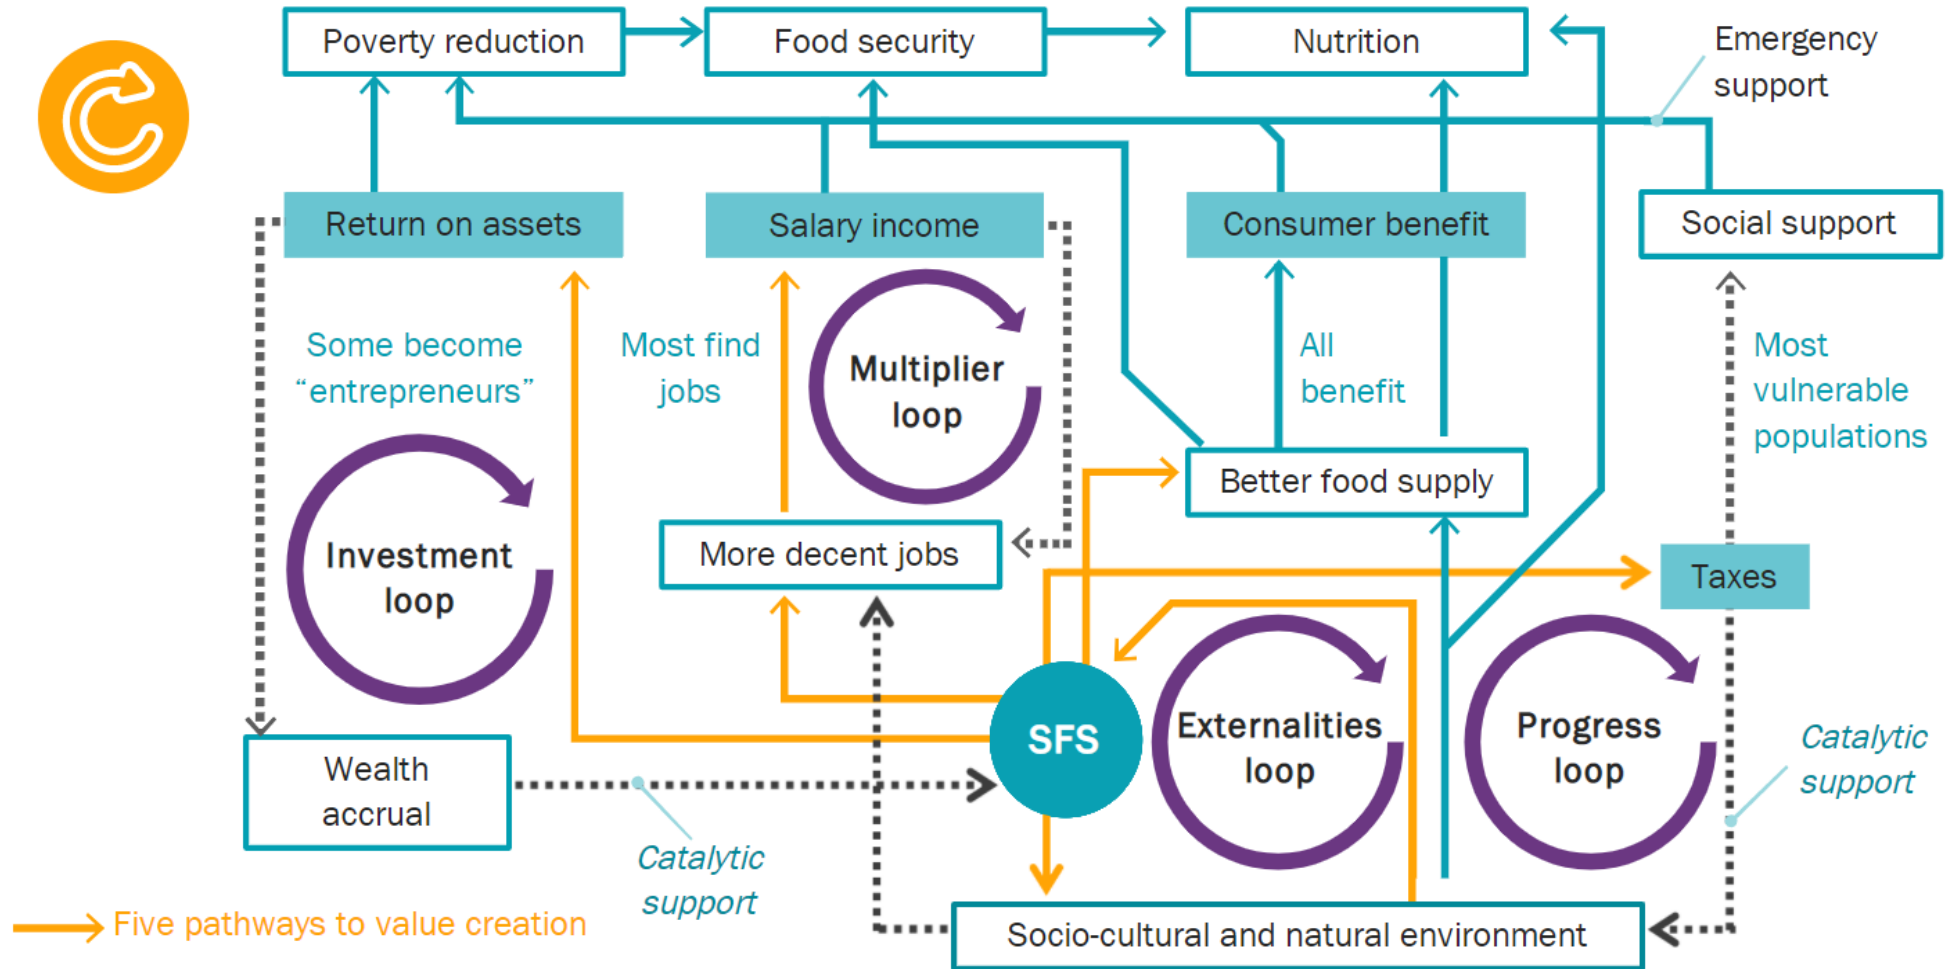

Sustainable Food System

Paradigm: Structure – Conduct – Performance of the FS, and Feedback Loops
