

Neo Pain Management 22

Dr. Atul K Shah M.D. (Radiology) Mumbai India

Although I am trained as Radiologist, for the past 38 years, I am practising Indian Flower Remedies, also called as Bio Energy remedies. I have done pioneer research work in pain management by injecting neo air of flower remedies. It is injected subcutaneously, avoiding all the vascular areas. It is injected only 0.1 cc of neo air. This is unique method. We use it on very few points for treatment of pain on different joints like shoulder, hip, elbow, ankle, knee etc. We can use this method for pain relief in the following conditions.

All major joint arthritis like knee, shoulder, ankle etc.

TM Joint pain (Lock Jaw) is our latest research work.

Abrasion Injury: When there is injury, apply around the area of injury. Do not inject directly on the open wound.

Abdominal Cramps, Aches (Pains) in general, Angina, Arthritis of small joints, Backache, Bed Sores, Bursitis, Carpal-Tunnel Syndrome, Cervical Spondylitis, Cramps, Fracture , Headaches, Menstrual Cramps, Muscular Tension, Rheumatism, Rigidity, Sciatica, Shoulders Pain, Frozen Shoulder, Spasms (Muscular), Sprains , Stiff Neck, Tendonitis, Writer's cramps etc.

We also incorporate Laser Therapy where we incorporate flower remedies through the laser for treating certain painful points.

I will be doing live demonstrations if there are enough volunteers available to show the results in few minutes only. There are different syringes with different neo air for various conditions.

This session will be useful for Orthopaedic surgeons, Anaesthetists, Physiotherapists, Dentists, Acupuncturists, and pain management professionals.
