

# CMS Care Compare and the Provider Data Catalog: Key Enhancements to Quality and Provider Data

Sandra Rodgers,<sup>1</sup> Christina Heavel,<sup>1</sup> Kathryn Foster,<sup>2</sup> Roberta Constantine,<sup>2</sup> Gequincia Polk,<sup>3</sup> Angela Wright,<sup>3</sup> and Linda Klingensmith<sup>3</sup> <sup>1</sup>SoftDev Inc.; <sup>2</sup>RTI International; <sup>3</sup>Centers for Medicare & Medicaid Services

### Background

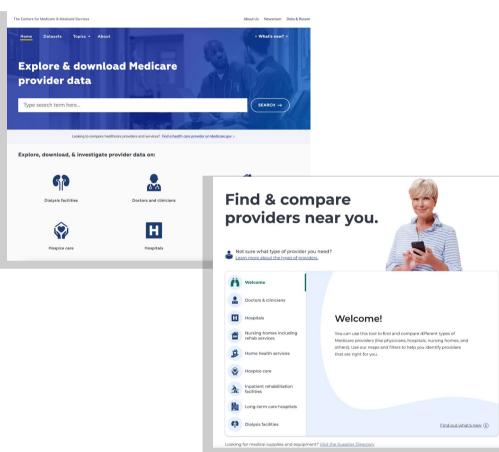

In late 2020, the Centers for Medicare & Medicaid Services (CMS) launched a major redesign of eight existing healthcare compare tools available on Medicare.gov. The resulting two new tools are Care Compare and the Provider Data Catalog (PDC).

Care Compare provides a single user-friendly interface that beneficiaries can use to make informed decisions about healthcare providers based on quality of care, services provided, and other data. The PDC allows stakeholders to explore, download, and analyze provider data in detail. To explore data in more detail, refer to the tools below:

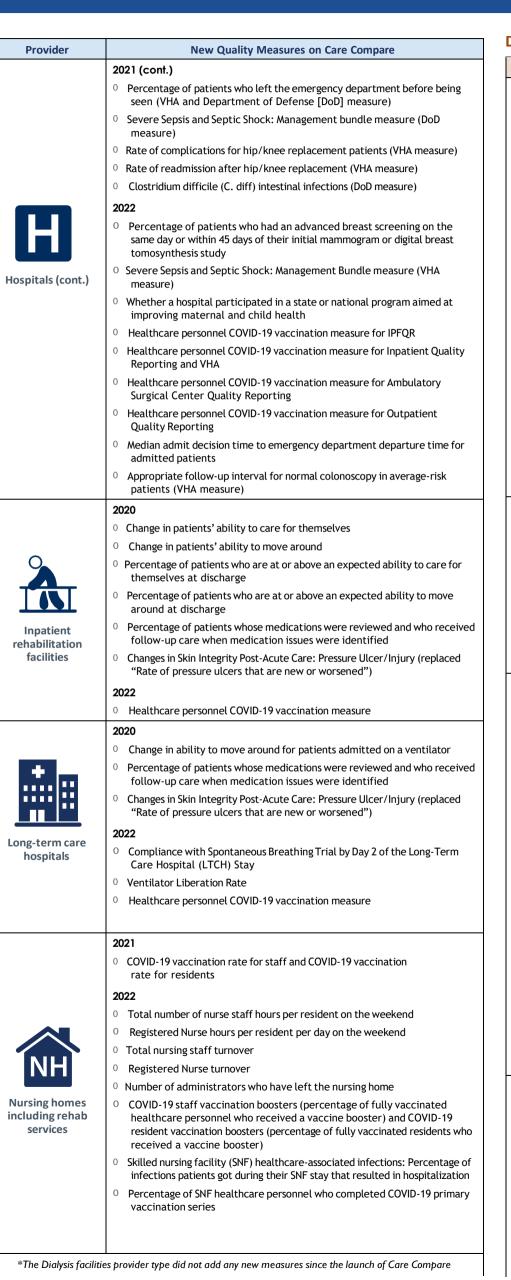

O Care Compare

0 PDC

Since the launch of Care Compare and the PDC, there have been significant enhancements to the quality and provider data available to stakeholders. Below, we review these major enhancements by

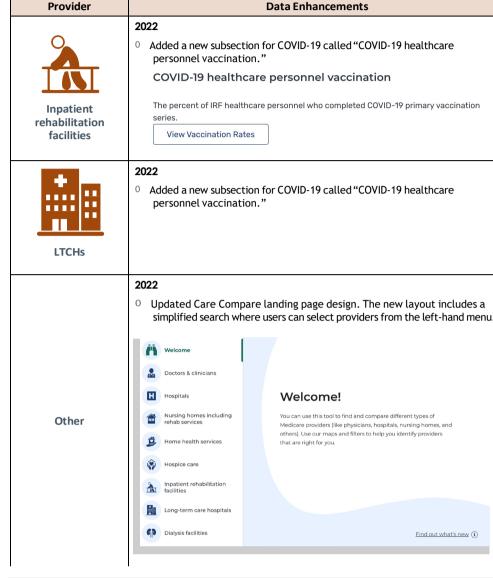

Provider	New Quality Measures on Care Compare
	<b>2020</b> : Performance Year (PY) 2018 Quality Payment Program (QPP) performance data posted for clinicians, groups, and accountable care organizations (ACOs).
PAU	2021: PY 2019 QPP performance data posted for clinicians, groups, and ACOs
Doctors and clinicians	2022: PY 2020 QPP performance data posted for clinicians, groups, and ACOs
	2022
Hospice care	<ul> <li>Hospice Visits in the Last Days of Life: Percentage of patients who received visits from a registered nurse or medical social worker on at least 2 of the final 3 days of their life</li> <li>Hospice Care Index score (0-10)</li> </ul>

transparent, Care Compare now displays citations under informal dispute.

### **Enhancements to PDC**

### Ongoing

O Continual improvements to dataset search feature.

0 PDC also includes additional quality measures and data that are not available on Care Compare.

O Updated "What's New page" to list all data refreshes and improvements.

O Added links to external archive websites at the bottom of each Topic Archive Data page.

### **Conclusion**

Since the launch of <u>Care Compare</u> and <u>PDC</u>, CMS has added valuable new performance data such as COVID-19 vaccination measures, family caregiver star ratings, detailed ownership and staffing data, and other information that allows patients to make more-informed decisions when choosing their health

Although this poster highlights new measures and other data enhancements, we encourage stakeholders to further explore the data available on both tools for themselves. In future years, CMS will continue expanding the data and adding new features to Care Compare and PDC. Stakeholders can stay informed of the latest updates by simply clicking "Find out what's new" on the Care Compare landing page.
