

# Highlights of the CMS Measures Management System (MMS)

<https://mmshub.cms.gov>

## Summary

CMS developed the **Blueprint for the CMS Measures Management System** to document the core set of business processes and decision-making criteria for measure development. The Blueprint, once a 100+ page document for guiding measure development, implementation, and maintenance, is now the **MMS Hub**.

**The MMS Hub** is a website created using human centered design and U.S. Web Development standards that transforms the MMS Blueprint's 100 pages of technical content into a comprehensive, easy to use resource for anyone developing, maintaining, and using quality measures.

## MMS Hub Highlights

You can access the four main tabs from any page:

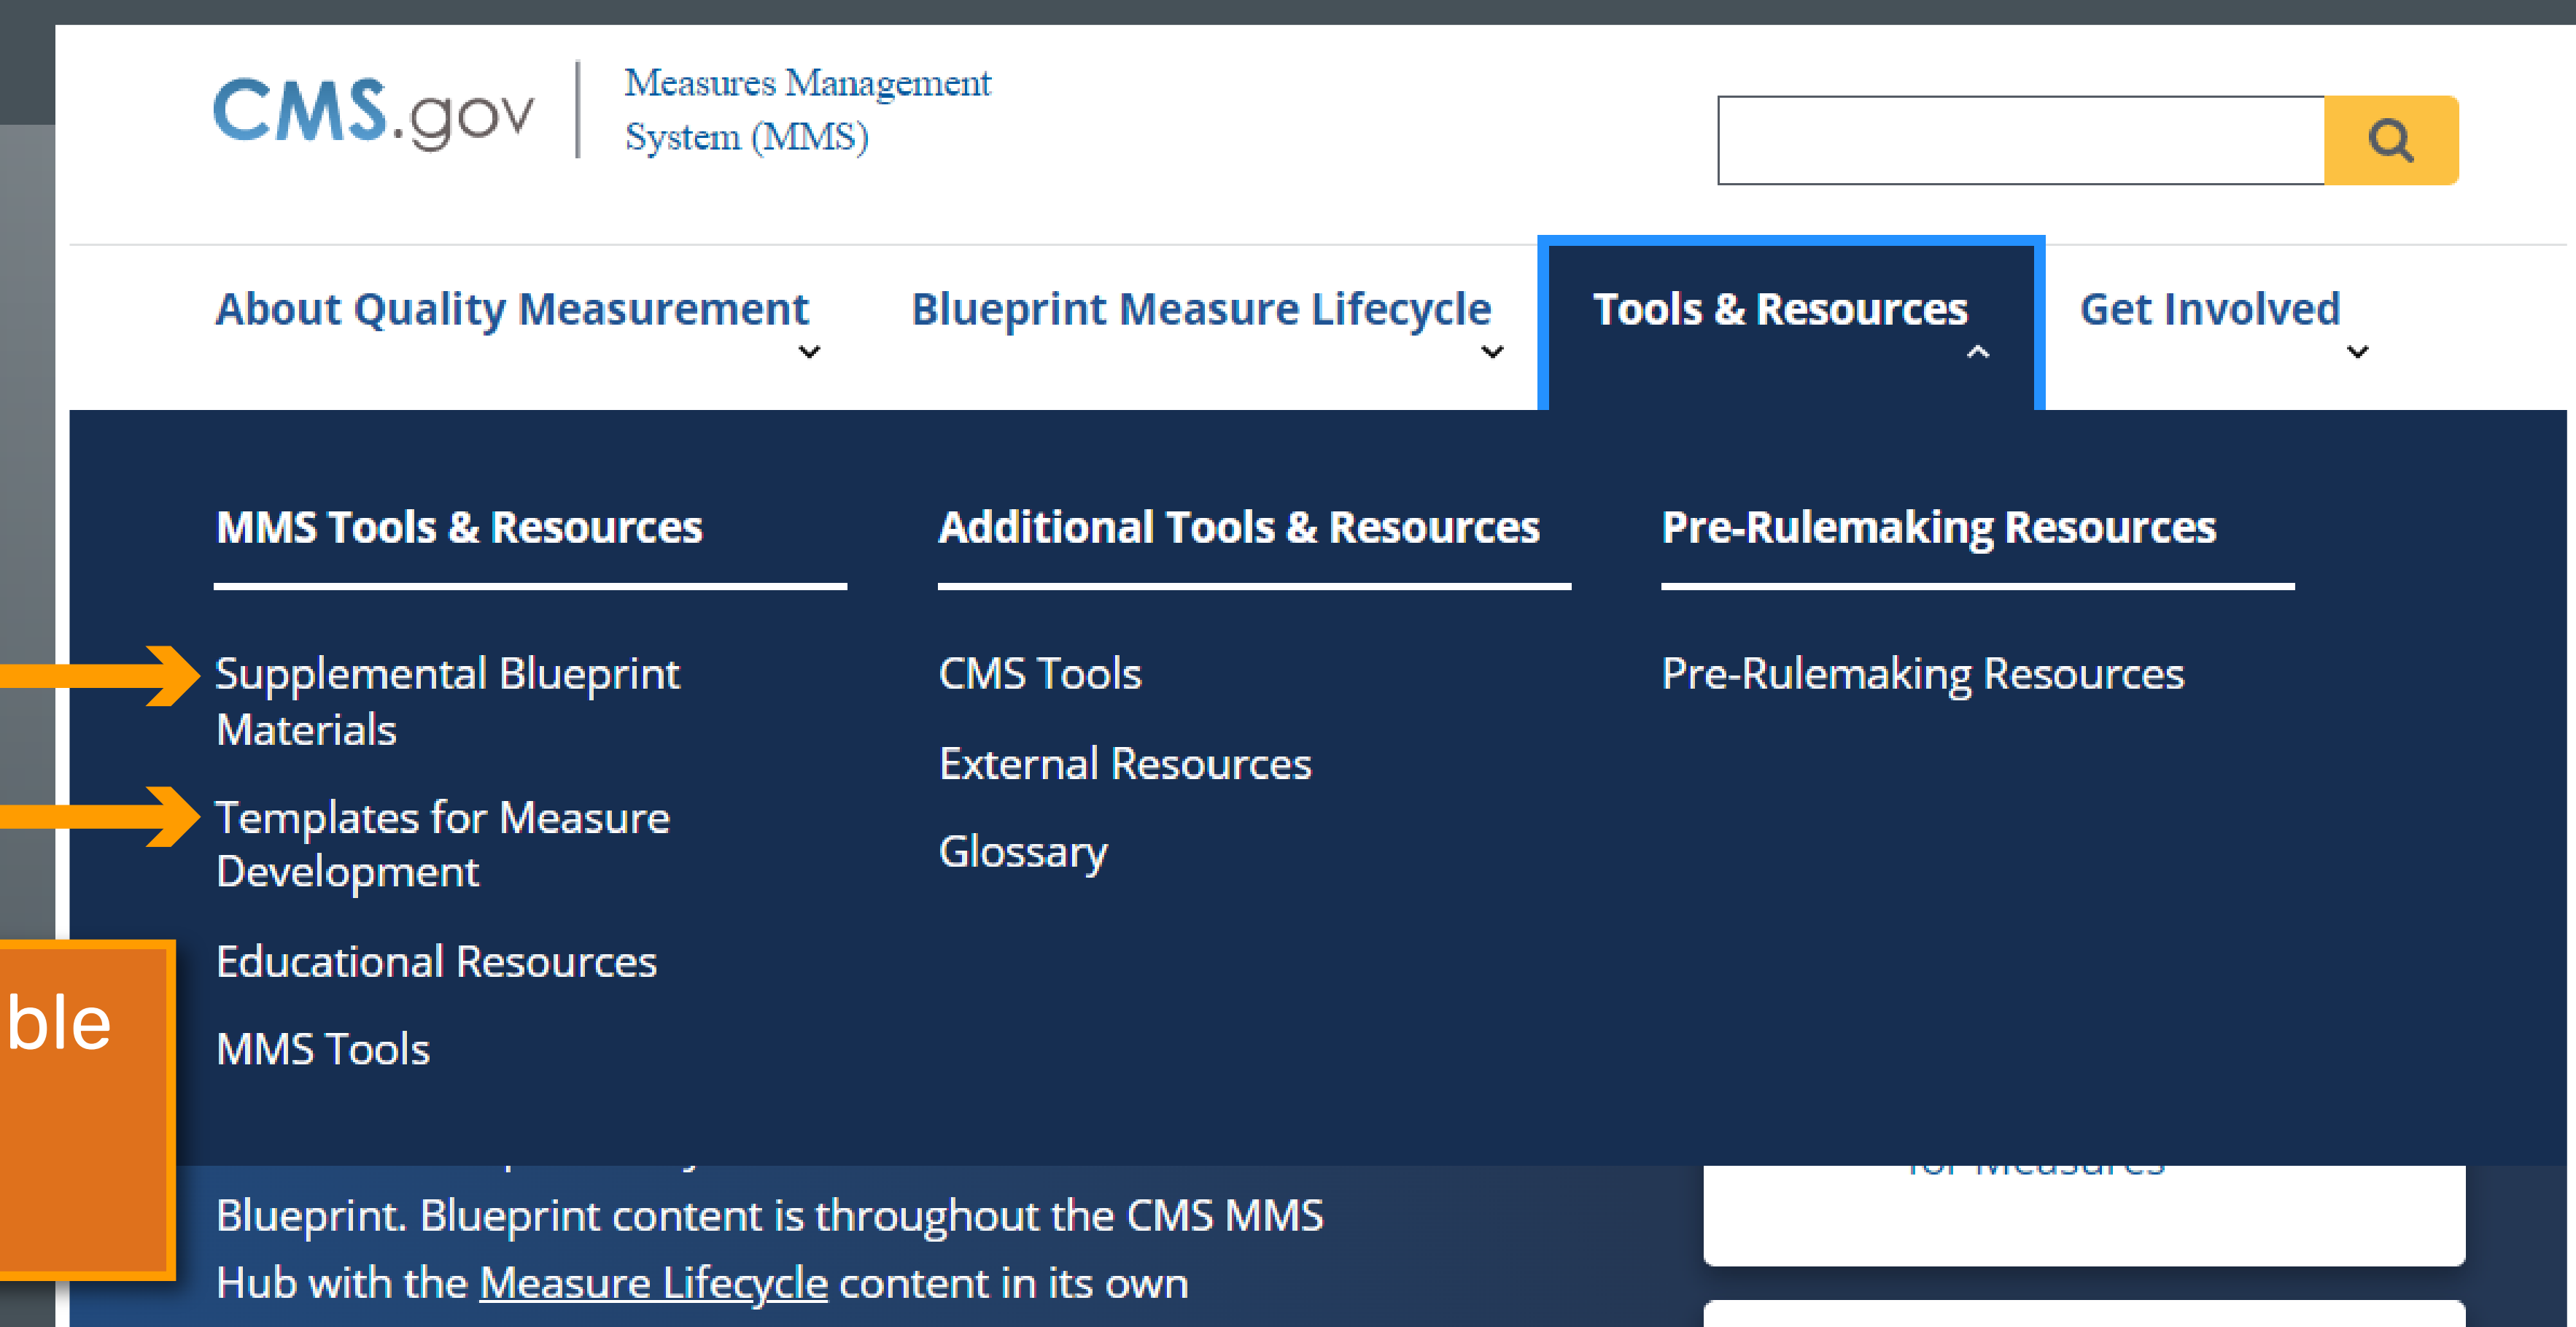

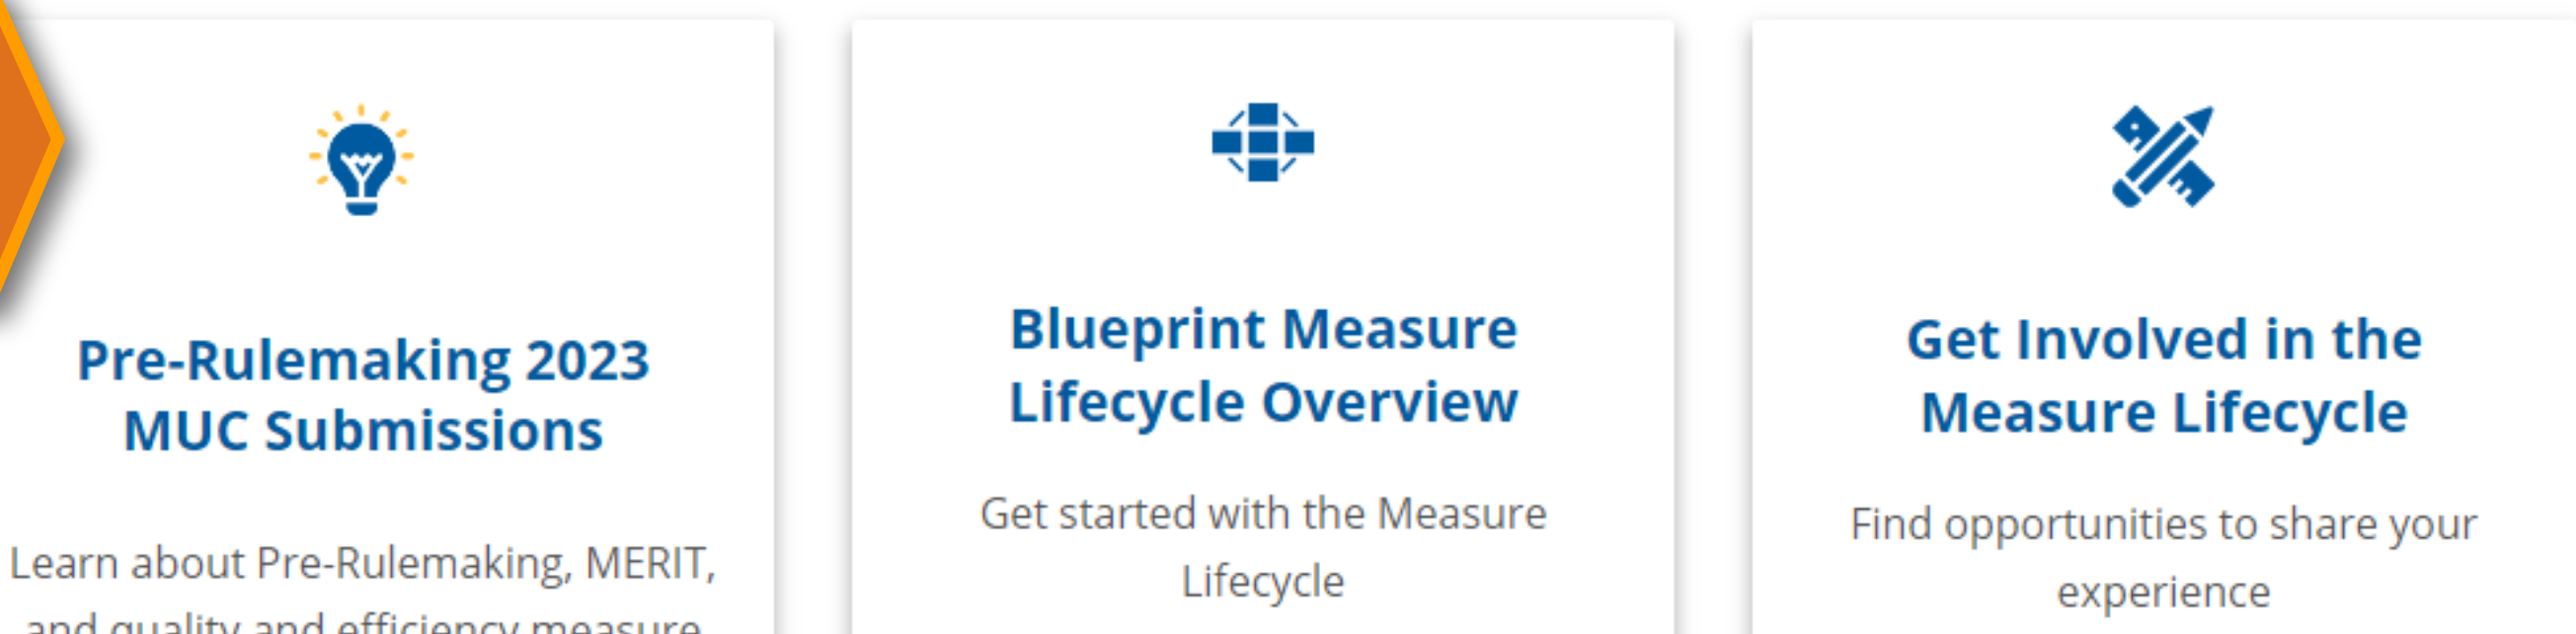

- About Quality Measurement
- Blueprint Measure Lifecycle
- Tools & Resources
- Get Involved

Please send your comments and suggestions for enhancement to the MMS Hub

[MMSSupport@battelle.org](mailto:MMSSupport@battelle.org)

Interactive tiles

Downloadable resources and forms

The Get Involved tab has a news and events section announcing upcoming engagement opportunities, including technical expert panels and calls for public comments.
