COVID-19 Run Rate

Methodology: Using a combination of Acute Inpatient Admission Date, Lab Result Date, and Acute Inpatient Discharge Date, we were able to determine a COVID-19 Related Acute Inpatient census by day. If a patient was present for any portion of a day, they are represented in that day's count.

7yo: you know what I love?

Me: what?

7yo: that every pencil has an eraser attached. It's like the world expects everyone to make mistakes. That's pretty cool.
